## C. W. ROSSELL.

### Max Kost Married.

A quiet but pretty wedding took place in Edmonton on Saturday last, when Miss Karolina Neumayer became the bride of Max Kost, the popular harness maker. The ceremony was performed at the German Lutheran Church by the Rev Mr Raywinkle.

Miss Neumayer recently came from Germany, and had been a visitor at the Schindler Ranch, having been acquainted with the Schindler family in the old country.

The happy couple returned to Stony in the evening, and took up their residence on Second street. They were given a chivari in the usual style by the town's juveniles, assisted by a bunch of visiting threshermen.

### Two Accidents on Saturday

A fine sample of the inhuman instincts of some motorists was shown near town on Saturday evening, about 10 o'clock. When Mrs A Klapper and her son were driving home from town, and near the Sunnybrook gate, a motor car coming from the south made a lurch over to the west side of the road, striking the Klapper horse, knocking it down, throwing the occupants of the buggy to the road. The motorist proceeded on his way, and a short distance further along bumped into young Glen Carmichael, who was riding horseback. The impact threw the horse down, pinning the rider's left leg underneath. Glen was carried into the Gilbert house, where his injuries were attended to, and was taken home Sunday morning. The reckless driver is supposed to have come from the City, and had spent the afternoon in the district duck shooting.

### Auto Accident Near Beach.

An auto accident occurred Sunday afternoon, near the Kotscherowsky farm, on the road to Edmonton Beach. Mr J A Berry of Holborn was turning from a side road onto the Beach road, when a car driven by Mr Kinnon, of Edmonton, suddenly loomed up from around a clump of brush and struck Mr Berry's pleasure craft about the fore-mid, bending the port deck, twisting the thing majig and amputating a wheel. Mr Kinnon had his wife and family with him, and these were thrown from their seats and sustained slight injuries. The Kinnon car was brought to Stony, where, after some repairs had been made, the owner was enabled to proceed to the City. A wrecking crew went out Monday and brought in the Berry car. Jack expects to save the steering wheel and the top.

### Favorable Rate for Potatoes.

The potato raisers of Edmonton District will be able, this fall, to ship their surplus crop into the city for storage and then to ship out to eastern or American points, when a favorable market offers, at the balance of the thru freight rates from their own stations, plus a charge of 4c per cwt. for terminal services.

The new system will have the effect of saving a large proportion of the potato crop since it will enable the farmers to take advantage of the better storage facilities in the city and thus avoid the heavy losses usually attendant upon the open pit system of storage in the field.

## LOCAL NEWS.

Mrs Wm Robertson and Miss Clara Oppertshausen left Saturday morning, on a two-months' visit to Vancouver and other points on the Pacific Coast.

Mr and Mrs C Schultz, Vegreville, and T J Dwyer, Edmonton, were in town over the week end.

Mr and Mrs D A Stuart were guests on Sunday last at the McNally Cottage, Edmonton Beach.

Hon Geo Hoodless was in Stony on Sunday last.

Mr H Ingram spent the week-end at Entwistle.

Mr Wm Graham has returned to Medicine Hat.

Messrs J Miller, general merchant, and Henry Biders have left for Monitor Lake, on a goose hunt.

Mr McEachern is under the doctor's care at the home of a friend in Lacombe.

Mr O Schindler has resumed his duties at the Miller general store.

Dr Frith was in town on Saturday last, and had a busy day.

Ph Trapp, general merchant, got in a car of flour last week.

The trustees of St Matthew's School made a business trip to Edmonton on Monday.

The old C. N. track has been abandoned west of the local station, and the rails removed. The ties have been purchased from the Company by Mr Ghieslin, and these will be disposed of locally.

A very fine piece of carpenter work in the shape of a pew is under construction in a local workshop.

The local elevators report no great rush of grain as yet, as farmers seem to be holding on.

The U. F. A. local holds its regular meeting on Saturday evening, October 7th, at the Royal Hotel.

The dance in Ducholke's Hall on Friday night was a very successful affair. The music was excellent, and the dancers had a very pleasant time.

### Next Sunday's Lecture.

On Sunday next, at 3 p.m., Mr H Looker of Edmonton will address a meeting in Ducholke's Hall, under the auspices of the International Bible Students' Association, his subject being "The Resurrection of the Dead." All who heard his lecture on the subject "Where Are the Dead" will look forward with pleasure to that occasion. The subject is one of vital interest, and a large number should turn out to hear the Bible view of this most interesting topic. All seats free; no collection.

### Help The New Immigrant

In announcing Canada's new immigration and land settlement policy, Hon. Charles Stewart, Minister of Immigration and Colonization, made it plain that the cardinal features of that policy would be (1) careful selection of immigrants in country of origin, and (2) wise direction after settling in Canada.

The importance of these two things can hardly be over-estimated. In the past Canada has lost tens of thousands of immigrants who, after coming to this country, have drifted away to the United States or returned to the land from which they came. The reason is not far to seek. Many in the first place were not of a type or class at all likely to succeed in this country. Others, and probably a much larger number, became discouraged because, through lack of knowledge and "wise direction" they made fatal mistakes, resulting in loss and ultimate failure.

Careful selection of immigrants in the country of origin will operate to prevent men and women wholly unfitted by previous environment and training from succeeding in a new country like Canada, from ever embarking on such a venture. For example, it is but inviting failure to send a man to Canada who all his life has followed, say, the occupation of silk weaving. He knows silk weaving thoroughly, but is qualified to succeed at that and nothing else. To send such a man and his family to make a livelihood in Canada at farming, or lumbering, or mining, is to invite trouble all round. He has neither the training, the physique, or the adaptability required to succeed.

What Canada needs and must have are the average sturdy men and women and boys in their teens who have the physique to stand hard work and can adapt themselves to manual labor. People who can work, and are willing and desirous of working on the land itself, are the type having the best possible chance of making a success in Canada.

But even more important than careful selection is the provision of wise direction after they have arrived in Canada. Many men and women having the qualities necessary to success have failed because of wrong direction, or no direction at all. They have become round pegs in square holes. Some have unfortunately located on land which was not suitable for agricultural operations. Failing where success was practically impossible they have left the country, whereas had wise direction been provided they would have been advised and assisted to locate elsewhere in Canada where success would have attended their efforts.

Therefore, the plan now proposed of keeping close check on every incoming immigrant and assisting him to get properly placed, and with advice and practical help when needed time him over periods of discouragement and seeming, though only temporary, failure, appears to offer the best possible chance of peopling our vacant lands with men and women who will win out and make a real success in Canada.

Such a plan to succeed must have the cordial support of individuals all over the country, and the plan formulated of creating local community clubs to care for and assist incoming settlers, thus building up a great national welfare organization, is good.

Coupled with this is the other, and sensible plan, of placing these new settlers on lands fairly close to existing lines of railway but which are now held by speculators and absentee owners. These lands, it is proposed, to have listed and sold upon long terms of payment, involving only a small annual payment of principal and interest upon the amortization plan. Settlers so placed will have a much better chance to succeed than those placed scores of miles from any available means of transportation, or located in "colonies" off by themselves.

People now resident in the districts where these new settlers are to be placed should be ready to help them, because by their presence local taxation will be reduced and modern services and utilities now denied to them because of prohibitive cost will be made accessible. Placing these people with in access of existing railways will operate to wipe out the present staggering debt on our National Railways, and in many ways this proposed more intensive settlement will make for success all round where the old policy of scattering people far apart over immense areas resulted so frequently in discouragement and failure.

# ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds Headache Rheumatism  
Toothache Neuralgia Neuritis  
Earache Lumbago Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark registered in Canada of Bayer Manufacturers of Monocarbolic Acid Salicylic Acid. While it is well known that Aspirin means Bayer, manufacturers to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

### New Building Material

Europe Using Discarded Shell Boxes Filled With Cement

Europe is trying something new and unique in building materials in connection with the great reconstruction movement in the battlefields districts. It is converting the boxes in which shells were transported to the front into building blocks. The boxes are filled with cement allowed to dry and then assembled like hollow tiles. They are said to form walls of great strength. In the present shortage of brick the cement filled shell boxes not only comprise a very acceptable substitute but greatly reduce construction costs.

### DO YOU FEEL LIKE THIS WHEN YOU WAKEN?

Do you feel blue, sickly, heavy, too tired to get up? If so, it's probably your liver which is slow, and needs to be toned and stimulated by Dr. Hamilton's Pills. It's a wonderful change. Dr. Hamilton's Pills will make in a few days. They relieve the system of poisonous wastes, they aid the stomach, improve digestion, increase your appetite. You'll feel like new all over after using this health bringing medicine. Thousands have proved it. So everywhere in 25c boxes or The Cataracton Co., Montreal.

### Hungarian Lake is Drying Up

Volcanic Changes Held Responsible Say Geologists

The biggest lake in Hungary, Lake Balaton, covering 360 square miles, would appear slowly to be drying up. In some places the water has receded a mile from the old shore line within a few years and the shrinking continues.

No one can give an explanation particularly as there has been plenty of rain recently. Geologists say that volcanic changes in the bed of the lake are responsible.

### You May Be Ill To-Night Have You a Remedy?

It may be a disordered stomach, perhaps cramps or acute indigestion. If you have no remedy handy, you're bound to suffer. Twenty drops of Nerviline in sweetened water will ease the pain and enable you to get a good night's sleep. It is a relief. Neuralgia, Sick Headache, or some other minor ache or pain, Nerviline can be used internally or externally and will be found a true friend for every family. Large 25c bottles sold everywhere.

Seamen have observed the glow of Rio de Janeiro, a city famed for its brilliant illumination, 100 miles off at sea.

It will Prevent Ulcerated Throat.—At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

The feminine vanity bottle was used thousands of years ago. Several estimated to be 2,000 years old have been found with mummies of Egyptian women of fashion. The Egyptian pots held stibium, a preparation of finely powdered antimony with which Egyptian women of fashion darkened their eyelids and pencilled their eyebrows.

Ask for Minard's and take no other

How Times Do Change!

The Walkerton Telescope resurrects an article from "The Walkerton paper" printed fifteen years ago urging the farmers to pledge every candidate for Parliament to use his vote and influence in favor of a law prohibiting automobiles from using the public highways.—Kincaid Review.

Rub It In for Lame Back.—A brisk rubbing with Dr. Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sits on the skin it comes out and there are ample grounds for saying that it is an excellent article.

Practice Makes Perfect

After a few years of marriage a woman can mentally plan a dinner party, make out an evening gown or redecorate the house while she is automatically kissing her husband goodby, after breakfast.—Helen Rowland.

Minard's Liniment used by Physicians

### Canadianizing Canada

The Value of Tourist Travel to the Dominion

Travel is one of the greatest elements in education and is one of the fundamentals of good citizenship. The desire to know one's own country should be inculcated into the system of every Canadian and to obtain an adequate knowledge, how can it be acquired better than by travel? "Canadians, See Canada," and "See Canada First," etc., have been adopted as slogans in the endeavor to create in the minds of Canadians the advantages of national travel and the attractions Canada has to offer.

The purpose of this article is not only to give expression to the importance of Canadians seeing Canada that they may have a fuller appreciation of what their own country has to offer them in the way of scenery and interest, but to emphasize particularly the value of tourist travel to the nation, and the duty we owe ourselves in developing our tourist territory—so to speak to capitalize the scenery. Possibly no other country in the world gives up to its people a greater area of country for recreation purposes and these great playgrounds are not confined to any particular section but are spread from the Atlantic to the Pacific. Then again from the seashore resorts of the Atlantic and the lower St. Lawrence to the Pacific Coast the interests are so varied and so distinct that it is difficult to name another that our Canadian people may use their vacations for years and find new scenery and new interest annually. From the quiet beauty of the Maritime Provinces to the more rugged scenery of the Province of Quebec, the almost continuous lake and river country of Northern Ontario, the Rocky Mountains so immense, beautiful and wonderful, on to the Pacific Coast, one cannot gaze without personal vision and knowledge what a wonderful asset we have in our widespread playgrounds and national parks.

But to make the most of these wonderful heritages, to realize the fullest amount of good that must be developed. The Provincial and Dominion Governments must be keenly alive to what the possibilities are. Good roads to the wonder places and beauty spots are essential so that the way of the tourist may be made easy and attractive.

Much has been done by the railways to advertise our tourist territory, which has resulted in millions of dollars being spent in Canada annually, principally by our neighbors to the south of us, but the fringe has as yet only been touched. The Canadian National Railways have just opened Jasper Park Lodge, in Jasper Park, that largest and most wonderful of all our national parks, 4,600 square miles of magnificent mountainous scenery. There wild life roams unmolested and thousands of tourists from all parts of the globe will gladly assemble annually when the park is fully developed with good motor roads and the system of lodges so auspiciously opened on June 15th last are extended, through the park. Jasper Park is but one of the many feature places to be developed. Mount Robson Park, just fifty miles west from Jasper station, is another. Aside from Mount Robson being the highest peak in the Canadian Rockies, 12,088 feet, the park which is entirely within the province of British Columbia, is an Alpine kingdom in itself, but until such time as it is developed, the glory and majesty of its scenery is denied the tourist who does not choose to ride a cayuse.

By way of comparison it has been stated that tourist travel in California alone nets approximately a hundred million dollars a year, and the more Northern Pacific Coast States, Washington and Oregon, add fully half that amount to the total, whereas it has been said that tourist traffic in Canada all told, did not net beyond ten or twelve millions.

Again, the provinces of Nova Scotia and New Brunswick have all the advantages of the State of Maine, but comparatively little has been done to develop them. What this development may mean in a measure can be expressed by the fact that Maine last year reaped a harvest of over \$40,000,000 in tourist business.

Our wonderful tourist territory is undoubtedly one of our largest assets, and greatest heritages to be developed, and in the opinion of international travellers who have visited us, Canada possesses the finest aggregation of scenery in the world. —Toronto Saturday Night.

### Says Tanlac Is Fine To Build Up Weight

Persons suffering from stomach trouble, who are under weight and an ever-ready friend in Tanlac. This celebrated medicine has ended indigestion and increased the weight for thousands of people everywhere. Mrs. M. Sanderson, wife of a well-known grain buyer of 261 Anderson Ave., Winnipeg, Man., says:

"I got so weak and run down the least bit of housework was too much for me. I just dreaded to eat, for my food would sour and keep me in misery for hours. I gained twelve pounds and look better and feel better than I have in years."

Under nourishment is the cause of most cases of under weight. Tanlac enables the stomach to extract the healthy nutriment from the food, build up the whole body and increase the weight to normal. Millions of people have testified to its great benefits. Get a bottle today at any good druggist.

Company U.S. is in

The list of absentees among the supporters of the League of Nations is more easily called than the roll of its membership: Abyssinia, Afghanistan, Ecuador, Germany, Hungary, Iceland, Mexico, Russia, Turkey and the United States. Raymond B. Fosdick in the Atlantic.

### KEEP CHILDREN HEALTHY

To keep children healthy the bowels must be kept regular and the stomach sweet. Nineteenth of the ailments which afflict little ones are caused by derangements of the bowels and stomach. No other medicine can equal Baby's Own Tablets in guarding either the baby or growing child from the ill that follow a disordered condition of the bowels or stomach. They are a mild but thorough laxative and never fall to give results. Concerning them Mrs. W. B. Coolidge, Sarnia, Ont., says: "I have used Baby's Own Tablets for over three years and have found them the best medicine I have ever used for my children. I never have any trouble giving them to my little ones and they have saved me many a doctor's bill. My advice to all mothers of little ones is to keep a box of the Tablets on the house." Tablets are sold by all medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

In the government of their East Indian possessions the Dutch have a law which provides that the testimony of any white man will be equal to that of seven natives.

### MOTHER SAVES DAUGHTER'S HEALTH

Lydia E. Pinkham's Vegetable Compound Helped Both Mother and Daughter

Lumden, Saskatchewan.—"My mother had taken Lydia E. Pinkham's Vegetable Compound and when I needed something for my periods I took it and got good results. I recommend it to women with any female troubles and I know other women who have been helped by it and do the same."—Mrs. MAX RETZER, Lumden, Saskatchewan.

Many cases like this come to our notice. Lydia E. Pinkham's Vegetable Compound is often recommended by the mother and the grandmother too, for fear in mind, it has been helped women for nearly fifty years.

Women Tell Each Other

In your own neighborhood are women who know the value of this wonderful medicine and they talk to one another about it. So if you are troubled with pains and irregularities, a tired feeling, nervous and sleepless nights, or other annoying symptoms caused by some female trouble, you have only to ask some neighbor what she has to say of your taking Lydia E. Pinkham's Vegetable Compound.

## Good Country Roads Have A Direct Bearing On Our National Prosperity

The difference between national progress and retrogression may be pitifully summed up in facilities of travel and transportation, and the maintenance of good roads is a matter which demands the unwavering attention of a modern country in no matter what direction it is making a bid for world prominence. National prosperity lies in a network of comfortable, easily travelled roads, and a country ranks among progressive nations according to its conveniences in accessibility and marketing.

The construction and maintenance of roads in Canada constitutes a problem that is peculiarly difficult. Canada is a land of tremendous area and small and scattered population. To adequately link up the settled areas of the country a network of roads is required which would be sufficient to render the same efficient service to a people many times as numerous. Upon a family of four persons in Canada rests the enormous responsibility of building and maintaining one mile of roadway and upon five average families the construction and maintenance of a mile of main market highway.

Again, the peculiarity of Canadian conditions creates the necessity for the maintenance of so many types of roads to accommodate the various methods of travel. Whilst the older settled cities and towns and the areas about them are most modern in every respect and their lines of communication as up to date as engineering can effect, there are many areas that have but recently emerged from the pioneering stages, and still other districts that are only being opened up to colonization and that must be served by roads of some kind.

The prime consideration in road building in Canada is possibly to enable the farmer to reach the markets with his product as conveniently and economically as possible, and this has first consideration in the drawing up of national programmes. A second requirement is to maintain good means of communication between the larger centres and to adequately serve and further encourage motor tourist traffic, which is rapidly increasing every year and has become a not insignificant asset in Dominion revenue. Each year the increase in the settlement and cultivation of farm lands makes necessary the penetration of new colonization areas, which can only be effected by the construction of roads which will permit new settlers to get into them with the least degree of trouble and inconvenience.

Canada is rapidly gaining a reputation abroad for good roads, consequent upon a Dominion-wide policy of co-ordinated expenditure. The eight of Dominion and Provincial Governments and their co-operation in construction and maintenance. The Canada Highways Act of 1919 was a recognition of the important part played in the development of national prosperity by good roads and elicited the co-operation of all sections of the Dominion in maintaining a high standard. The bill made the sum of \$20,000,000 available during the following five years, to be divided among the provinces on the basis of population, with the expenditure of proportionate amounts by these provinces to a total of \$30,000,000.

At the present time there are 18,000 miles of main roads in the various provinces and networks of communications branching off from them to serve the rural areas. In addition to the maintenance of these, new roads are being constructed each year. These serve to join up the provincial centres, and it is now the aim of the various governments to join up the provincial systems and provide a main highway across Canada from coast to coast, an undertaking not difficult of accomplishment and the accomplishment of which may be soon expected.

Excellent motor roads join up all the principal civic centres and the avenues to the international boundary are maintained at a fine standard. Last year half a million motor tourists visited Canada from the United States alone, staying for various periods from one day to six months, and it is stated that the number of visitors staying for over one month has doubled within the past few years. In many cases the upkeep of such high-

ways as Toronto-Hamilton, Ottawa-Montreal, Montreal-Quebec is paid by the tourist traffic upon them, and the completion this year of the roadway of the Grand Circuit Motor Tour, running from California in the south to Alberta in the north, linking ten national parks, and constituting the finest scenic motor tour on the continent, is expected to bring the Dominion an unprecedented volume of motor traffic.

The importance every section of the Canadian people attach to the possession of good roads was evidenced at the last good roads convention held in Victoria, B.C., which drew from Atlantic to Pacific, cabinet ministers, members of parliament, provincial and civic engineers and prominent business men from all sections of the Dominion, as well as attracting representatives of many states of the Union for the exchange of views and experiences. It marked the half-way house in the progress effected since the passing of the Canada Highways Act and formed a point of retrospect as well as prospect. To date 294 agreements for Federal aid have been authorized for 5,125 miles of provincial road at an estimated cost of \$19,461,515. The total amount of provincial expenditures audited with respect to this work is \$15,971,531, and the total amounts of payments made with respect thereto is \$15,179,375. The total mileage of completed Federal aid work to the time was 1,460 miles and the mileage under construction 2,397 miles.

### World's Wheat Crop

Increased Production in Both U.S. and Canada

The world's wheat production will be less than it was last year, but considerably greater than the year average, according to estimates made public by the United States Department of Agriculture. Actual estimates and condition reports from reporting countries indicate a yield this year of 2,919,556,000 bushels compared with the production last year of 3,059,596,000, and the 1909-1912 average of 2,890,353,000 bushels.

Reports from all sources regarding Russia said crop conditions were favorable and would feed the nation this year, eliminating the need of import of wheat. Nearly all European countries, however, reported decreases, the total European production being estimated at 1,100,921,000 compared with 1,239,225,000 in 1921 and the pre-war average of 1,275,157,000. British India and Japan are expected to produce 392,847,000 bushels compared with 329,094,000 last year, and the pre-war average of 376,827,000.

Increased wheat production in both the United States and Canada was indicated, the combined estimate being 1,125,968,000 bushels this year, compared with 1,095,751,000 in 1921 and the pre-war average of 883,310,000.

### Radio 26 Years Developing

Progress of Wireless Communication Not So Rapid As Might Be Supposed

The progress of radio has not been so fast as its last year's development would lead people to believe. In fact, it has been even slower, in gaining popularity than the automobile. It was 26 years ago that Marconi succeeded in signalling without wires for a distance of 100 yards. For years before 1898 he had been experimenting on his father's farm in Italy.

One year later he signalled nine miles and in two months increased the distance to 12 miles. In July, 1898, he signalled 20 miles and in 1901 his wireless messages crossed the Atlantic Ocean.

### Faculty Violates Rule

Examination of 10,000 employees in factories showed that 63 per cent. had uncorrected, faulty vision. Of 676 employees on a typewriter company 88 per cent. were found to be in need of glasses. Among 2,000 employees in a paper-box factory the percentage of those with normal sight was only twenty-eight.

The largest meteorite known to the "Cape York meteorite," brought by Peary from Greenland in 1897. It weighs 36 tons.

## Says North Pole Easily Reached from London

Trip Could Be Made By Airplane In Few Days

Modern airplanes of the German type could make the trip from London to the North Pole, a distance of 4,600 miles, within a week, says Major Richard Carr, aerial expert of the Shackleton Antarctic expedition. Fuel for the entire voyage could be carried, and no landings need be made.

"I am fully convinced that we have left far behind the old-fashioned methods, and that if future polar exploration will be done by aircraft during the summer months," Major Carr continues, "Very few persons realize how mild the Arctic and Antarctic summers really are, and the wonderful improvement in aircraft."

Major Carr made important observations on flying conditions in the Arctic. "During the seven weeks we were in the ice," he says, "the lowest temperature recorded was five degrees Fahrenheit and the average approximately 20 degrees. The wind average was eight to 10 miles an hour, and the air and sky were wonderfully clear. So clear was the air that navigation was very frequent. We had more than 300 perfect flying hours."

### Canada's Finest Ship

The Empress of Scotland is considered the finest ship in the Canadian service, as far as is largest. She has nine decks, is 575 feet in length, and 77 feet breadth, and is 25,057 tons. She is comfortably and luxuriously fitted, adapted for burning oil fuel and has a complete system of wireless telegraph fitted, including a long-range installation and apparatus for taking wireless bearings. Submarine signaling and electric clocks are fitted, also the modern type of gyro compass.

Showing What Thieves Ants Can Be.

WONDER if you want to hear about the worst characteristics of the Ant? Stella, the Wishing Fairy, asked her Brownies.

"Well," said the Fairy, "we all know the many good traits of the Ant, and we talk about them. Humans study them and marvel in astonishment, but no one ever stops to find any Ant faults. We know of the Ants' perseverance and how unflinching they work at gigantic tasks. We know how clean they are, how thrifty and saving they have shown themselves to be. It's all very wonderful, so I suppose one shouldn't be too hard on their little habits and qualities, for no matter how good and praiseworthy anyone is, there is absolutely nobody living so perfect that he is wholly without faults."

"Yes, that's true," Fimie said impatiently, for he was thinking of his own, "but tell us of these mysterious Ant faults."

"There is nothing mysterious about them, Fimie, dear," said Stella with a smile, "for anyone who knows much about Ants knows what I mean. The two faults that the Ants are guilty of are particularly horrid ones—greedy and dishonesty."

"We know all about Ants from you, Fimie," the Fairy continued, turning toward him, "for I remember when you came back from the world where Humans live and told us about having seen the Russet Ants' raid on the Pusan Ants' village and the cruelty they showed toward the poor Pusan slaves whom they either killed or captured and—"

"And the Agricultural Ants of Texas who plant their own seeds, harvest their own grain, who have red beards and promenade on roads they have especially built, and Fimie grunted, glancing mischievously out of the corner of his eye at Snookums."

Do you remember how furious Snookums was the day Fimie told about the Ants with red beards strolling on promenades? In spite of the fact that it was perfectly true he always thought that Fimie had made up the whole story just to fool them.

"It's a wonder, Fimie," he said scornfully, "that you didn't try to make us believe that those strolling Ants with red beards of yours didn't carry blue parasols!"

Stella was really afraid that her two Brownies were beginning a quarrel, so she quickly interrupted.

"They are no more strange," she cried, "than the Termites Ants who build themselves enormous clay houses and grow mushrooms in them; but, to continue with what I was telling you: All Ants are thieves. Not only do they steal from other Ants, such as herds of Alphids (tiny insect cows) for the honey milk which they yield, but one of their favorite tricks is to rob big, good-natured Locusts. This is what happens: When an Ant sees a Locust who has bored a hole in some delicious juicy plant and who is thoroughly enjoying himself while sucking out its sweetness up Miss Ant's carmine trolleys. Now, as everyone knows, an Ant is a very thrifty little creature on warm summer days, so Miss Ant enviously closes closer and closer to the Locust, who is so unsuspecting that he allows her to share the cool juices. Miss Ant becomes greedier and greedier, but knowing that she would be unable to oust the big Locust from his drinking place and have it all to herself, she hurries away, furtively enough Ants to overpowered the Locust and return with them to get entire possession of the envied spot. And they succeed, too."

"Some of them fasten themselves on to the Locust's legs, tugging and pulling at him, and they finally get the best of him; for while they have been doing this numbers of other Ants have been alighting and biting him so that after a short while he is only too glad to surrender."

"The marauding little robbers—Miss Ant and her gang!" exclaimed Kinkas in amazement. "But, just the same," lazy, greedy Lorrykins said with a smug gleam in his eyes, "he knows that he has got it, it must have been a big temptation to not let the Locust's juicy drinking place."

## Silos And Silage For Winter Dairying In Western Canada

### Invents New Thresher

Machine Constructed by Brandon Man Is a Recognized Success

J. B. Hathaway, of Brandon, has invented a new threshing machine which, according to experts and practical farmers, will revolutionize the separator industry. Briefly, it is said to be the "Ford" of separating machines, and will cost approximately \$600.

The machine is called the "Mighty Atom," is six feet high, twelve feet long, 44 inches wide and weighs 2,000 pounds.

The invention is the result of fifteen years' work, and has been demonstrated to the local Board of Trade and well-known farmers of the district. As a result of this demonstration, it is stated, the machine is a recognized success. Already three have been constructed by Mr. Hathaway and a patent applied for.

### Cross-Purposes

It was a breach of promise suit and the nervous young defendant was being severely cross-examined by counsel for his little fiancée.

"Now, am I to understand that you pressed your suit again in the autumn of 19—?" inquired counsel.

"No," was the unexpected reply, "I bought a new one!"

Criminal lunacy in England is said to have increased since the war, asylums which were formerly full up being now almost empty.

"If interest in providing winter feed for cows may be accepted as evidence of prospective development in winter dairying, then Saskatchewan dairying is due for a forward step the coming winter," states P. E. Reed, Dairy Commissioner for Saskatchewan.

"While markets and marketing are always chief topics of discussion with dairymen," he states, "silos and silage certainly hold the centre of the stage in all parts of Saskatchewan just now with the sundowner crop as the star of the troupe. Within recent weeks, reports of excellent crops of sundowners with enquiries concerning the handling and storing of them, have come to the dairy branch from practically all parts of the province. The great problem now is the construction of excavation silos. Many good lumber silos are being erected one year and they afford, at least, the most convenient means of storing succulent feed for winter use. But it has been amply demonstrated that green forage crops may be satisfactorily cured and stored in either pit or trench silos and where cash is scarce this is undoubtedly the system to adopt. The pit silo is simply a round hole in the ground like a well but with a greater diameter, usually 11 to 13 feet across and any depth down to the water line, while a trench silo, as the name implies, is a trench 12 to 16 feet in width, 8 to 10 feet deep and of a length to suit the size of the herd or the amount of crop to be stored. Silage crops are easily and cheaply grown and ensilage is undoubtedly the best and most economical feed for winter milk production. Hence a good motto for all dairymen would be 'put a silo up or put one down, but grow ensilage crops and have a silo.'"

One dairymen in the north of the province reported a few days ago that he had a field of sundowners which would average eight feet in height. A representative of the Dairy Branch, visited Harris district recently at the special request of the local dairymen to give some advice and assistance in making sub-surface silos and handling the crops. In the immediate vicinity of Harris in the famous Goose Lake wheat district, he found nearly one thousand acres of corn and sundowners. One grower alone had three hundred acres in corn, while another had fifty acres, and the remainder was scattered in smaller acreages. One dairymen there had been successful in the some what unique accomplishment of excavating a pit silo with horses and scraper. A circle 16 feet in diameter was laid out by leaving a driveway cut at one side the greater part of the earth was removed with the team and scraper to the full depth of 17 feet—a great saving in labor when compared to moving it with a shovel and hoisting with a bucket.

"Another member of the Dairy Branch, staff, who is working in the northeast part of the province, reports many new silos in that district. (There are), he adds, many good fields of sundowners in this district, in fact one sees fields of sundowners everywhere in Saskatchewan. The same is also true with regard to new silos; they are in evidence in every part of Saskatchewan."

"In addition to corn and sundowners there has been a much greater interest this year than ever before in the growing of all kinds of forage crops, not only for winter feeding, but for late summer and fall pasture. This, of course, is not all attributed to preparation for more extensive dairying, but to the more general term of more livestock raising or better balanced farming."

### Japan's Unemployed

In Japan there is little evidence of unemployment even in times of business depression. Most of the industrial workers come from the little farms into which the country is divided, and, since they have a strong family feeling, they go back to their country relatives as soon as they are out of work in the cities. A "strong family feeling" of that kind, it seems to us, might easily become more prized by those who have it than by those upon whom they permit it to rest.

Toll rates through the Panama Canal average \$1,000 per hour.

## TO REMOVE BAD COLD MEDICINE NOT NECESSARY

**The Balsamic Vapor of "Catharhozone" When Inhaled Quickly Disperses Colds**

Every breath you draw through Catharhozone Inhaler fills the whole breathing apparatus with pure piney essences that stop colds at their very beginning. You experience a pleasant sensation of relief at once. Soreness, congestion and irritation leave the nose and throat—the head is cleared, and every trace of cold and catarrh disappears. Catharhozone is so sure, so pleasant, such a safe remedy for winter ills that you can't afford to do without it. Get the dollar outfit. It lasts two months; small size 50¢; trial size 25¢ at all dealers or the Catharhozone Co., Montreal.

(Continued)

Bar B Ranch,

August 31st, 19—

On Monday, August 29th, at 3.30 p.m., peace was declared. Even more important is the fact that I won, and that Mr. Livingstone plays the part of the humble vanquished to perfection. Mr. Bingham had intended to come into town with us on Monday, but at the last minute something occurred to change his plans and Mr. Livingstone came instead. Imagine the joys of a twenty-mile ride with a person whom you do not feel free to talk to!

We made an early start and reached the town just in time for luncheon. The whole afternoon shopping had dinner and a half-hour nap afterwards, then started for home again, reaching the ranch shortly before midnight. What do you think of that for a strenuous day? Sunny slept nearly all the way home, and I wanted to but did not.

Carbon City's largest shop, where we spent the most of our time, is just like the Elba General Store, only bigger. There is the same incongruous variety of goods, the same group of loungers, and the same friendly interest in customers' affairs on the part of the clerks. I needed nothing but glycerine and rose-water, of which I use quite a lot, so when I had laid in a good supply of this, I wandered to the other end of the store, on picture postcards bent, leaving Mrs. Bingham to continue her search for Sunbroom slippers and sandals.

A very obliging young "salesman"

## Appetite Good, Gained 20 lbs. Could Not Feel Better

From a nervous wreck this man was restored to health, strength and happiness.

He tells his own story in this letter.

Mr. Ralph A. Roberts,  
Loverna, Sask., writes:

"In 1917 I had lost all appetite, failed 25 pounds in weight, became very nervous and shaky and in fact gave up all hope of recovery. For some time I had suffered from constipation, which kept getting worse, until I was fast becoming a total wreck. Doctors and their drugs were sending me to my grave at the age of 39.

"Then I read about people being restored by Dr. Chase's Medicines and after three months' use of Dr. Chase's Nerve Food and Kidney-Liver Pills I found that my bowels were restored to normal movement each day and the constipation was no more. I had a good appetite, had gained 20 pounds and could not feel better. I shall always be grateful for these benefits."

Dr. Chase's Nerve Food, 50¢ a box; Dr. Chase's Kidney-Liver Pills, 25¢ a box, all dealers or Edmondson, Bates & Co., Ltd., Toronto.

assisted me to pick out several dozen postcards of the wild and woolly variety that I affect for my British correspondence—the people at home expect cowboys and Indians, so why disappoint them?

Just as I was turning away he leaned across the counter and said in a confidential whisper, "Beg your pardon, Madam, but there's something I'll bet you never seen in the Old Country."

I followed his pointing finger until my eyes rested on a testable presiding over by a smartly dressed woman. "Are you serving tea in the shop?" I asked.

"No," he explained, also confidentially; "she's what we call a 'demonstrator.' It's really a Yankee advertising dodge. You see, that lady represents a big manufacturer of canned goods and jelly-powder, and she goes around to the different cities and serves samples of the stuff in the principal stores, and takes orders too. Better go over and sample the things; they're a real good brand. Miss Montgomery will be only too glad to let you see the way we run things over here—that's her job. I don't suppose Montgomery is her name; demonstrators are like actresses, they change their names for the good of the trade."

Thanking my instructor, I proceeded to follow his advice. There were several people standing between me and the table, and it was not until I was close beside him that I noticed the demonstrator sitting opposite the demonstrator and calmly consuming a dish of peaches!

"You here!" I stammered awkwardly.

"Sure," he replied. "Didn't you know that I never could resist a peach?"

The demonstrator giggled appreciatively. "Them gentlemen are all alike, ain't they?" she sympathized. "But they are different once they've been married a while. I should know, for I've had four."

From the look of her gay and rosy eyes I imagined that a fifth would not be unwelcome. She was one of those conspicuously blonde blondes, bolstered rather than clothed in the usual way. In fact, she made me think of the girl that Mary told me about who had to put on her dress with a shoehorn.

"Won't you try some jelly?" she asked sweetly. The peaches were some richer than ladies usually like, but they are always what the gentlemen ask for."

"I'm not keeping house," I began. "So it is not likely that I can give you an order. But I should like to try your jelly."

And once more the lure of the unknown led me into mischief.

"Just boarding, are you?" my hostess asked with interest, as she served me a generous portion of plain apple jelly and passed a plate of wafers. "I always think that's a mistake for young people just starting up. I'm sure Mr. . . will agree with me—a man always wants a home of his own, don't he, now?"

"Nothing would suit me better," agreed Mr. Livingstone heartily, "than to see my wife getting a can of these peaches in our own kitchen."

The demonstrator turned to me. "I'm old enough to be your mother, even if I don't look it," she said impressively. "So I'm just going to give you a word of advice. If you've got a good man that wants a home of his own, don't make him live in a boarding-house and they're mostly got Chinese cooks in this town, don't they? I'll be back here in the spring again, and I hope by that time you'll be able to give me a good-bye order. Not that I'm so dead set after commissions, you understand, but because I hate to see a likely young couple make a mistake."

Mr. Livingstone choked on his last piece of peach, and I blushed crimsonly—not because I was embarrassed, but because the woman's blunder had given me an inspiration, and inspirations always affect me in that way.

"There was a house that we passed this morning," I began shyly, "and someone said it was for sale. And it's awfully good of you to take an interest in our affairs, isn't it, Don?"

"Don't gasp a confused assent, and I rejoiced inwardly as inspiration followed inspiration."

"I'll tell you what we might do," I went on. "I have become very much interested in the little hospital here—wouldn't it be just swell to send one of a box of jelly and preserves? Let me see, a dozen tins of peaches and two dozen packages of jelly-powder will be enough, I think. You pay for them, Don, while I go for my other part."

And with this I escaped. I did not see Mr. Livingstone again until we met for dinner. He was in the dining-room when Mrs. Bingham and Sunny and I went in, and as I entered the door he turned towards me with his hand out. "You win, Miss Elliott! The matron wishes me to thank you for your very welcome donation."

Then with a return of the old-time finish, it is really not so unpleasant when one becomes used to it. He finished, "There's a lively stable in the pen just by the word and I'll order a pair of saddle-horses. I don't feel as if I could wait until to-morrow!"

(To be continued)

Fellowship your local Printer. It is poor policy to send your job printing out of town. It does not pay, no matter which way you look at it.

## Castoria, or Something Else?

FLETCHER'S CASTORIA is particularly a preparation for Infants and Children made agreeable to the taste, acceptable to the stomach and pleasant in its action. It has been in use for over thirty years and has always been one of the most highly esteemed of all cathartic preparations.

It has one great advantage over other preparations of its kind in that while it opens the organs readily and completely, it does not have a tendency to produce subsequent constipation so much to be dreaded.

Fletcher's Castoria having been prepared solely for our little-ones, should not be confused with ordinary cure-alls or preparations primarily compounded for grown-ups. The child's organism, so delicate and tender, requires specially prepared medicines and foods, the one no less than the other, as mother-love well knows, and mother-love can not be deceived.

## Children Cry For

*Fletcher's*  
**CASTORIA**

### What is the Matter with Baby?

It cries fretfully, is restless and does not sleep well, its bowels do not move or it has diarrhoea, it does not eat or it has flatulence and vomits easily. You know baby is sick. You want to help baby get well safely and quickly.

If you are wise you will use Fletcher's Castoria, the wonderful remedy for babies' ills, that was discovered by a family doctor and that has been used for over thirty years.

When you have learned the value of Fletcher's Castoria you will never be without it, you will tell other mothers what a useful remedy it is. You will be able to keep baby well and happy by using it to keep its stomach sweet and its digestive organs acting naturally. You will call Fletcher's Castoria the Children's Comfort and the Mother's Friend.

Don't say tomorrow — try it today. And above all things don't try to relieve baby with a remedy that you would use for yourself.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

## She Has Raised A Family Of Ten

**DR. FOWLER'S  
EXTRACT OF  
WILD STRAWBERRY  
NEVER FAILED HER**

Mrs. Ervin W. Stairs, East Waterbury, N.B., writes: "I have raised a family of ten children and have always used Dr. Fowler's Extract of Wild Strawberry for summer complaint, and it has never failed."

Four years ago when the cholera was about, some of my neighbors called in the doctor, but could get no relief. I told them about Dr. Fowler's Extract and after taking it they were soon well again. I also used it for two of my own children, and the same time when they were passing blood, and a few doses soon made them well."

If you want to be on the safe side ask for Dr. Fowler's Extract of Wild Strawberry, and insist on getting what you ask for. There are many imitations on the market, so be sure and get the original "Dr. Fowler's"; price five cents, put up only by The T. Milburn Co., Limited, Toronto, Ont.

A bridge spanning Snake River, Idaho, 446 feet from floor to stream, is the highest in America.

### Beginning of Life Insurance

First Company Was Formed in London in 1706

Life insurance originated in 1706 in London. In that year there was formed the first life insurance company. It was called the Amicable Society for a Perpetual Assurance Office. It was a mutual benefit concern.

Each member, without reference to age, paid a fixed admission fee and a fixed annual charge per share on from one (10) shares, and at the end of the year a portion of the fund accumulated was divided among the heirs of those who had died. In accordance with the number of shares each dead person had held. Out of this company, with its crude and imperfect methods, life insurance as it exists today has grown.

Asthma is Torture. No one who hasn't known what such suffering is. Thousands, to know, however, the relief provided by that marvelous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

### A Chance for Profitless

It is rather surprising that the English profiteer, anxious to invest some of his money, does not turn his attention to Austria. For three milliard kronen he could obtain possession of a baronial castle with both ancestral portraits and a hot water supply. The figure sounds large, but it means an expenditure of only \$250. Complaint is made of the high rentals of shooting in Scotland. A magnificent "shoot" in Austria, extending over innumerable square miles, may be rented for as much as of \$20.—Lovers Weekly Post.

### Had the Opposite Effect

Her father (discouragingly).—Do you know, young man, that my daughter is accustomed to getting everything she wants?

Jack Poore.—I'm glad to hear that, for I know she wants me.

Small Notice No. 1, Mascoche, Que. The Mascoche "Secret People."

"Sir—I feel that I should be doing a wrong if I neglected to write you. I have had four tumors growing on my head for years. I had them cut off by a surgeon about fifteen years ago, but they grew again till about three months ago I had one as large and shaped like a lady's thumb on the very place where my hair should be parted, and it was getting so embarrassing in public that it was a constant worry to me. About three months ago I got a bottle of your liniment for another tumor and saw on the label good for tumors. Well I tried it and kept it for exactly two months, with the result that it has entirely removed all traces of the tumor, and were it not that they had been cut fifteen years ago, no mark would be seen. I have not been asked for this testimonial and you can use it as you see fit."

(Signed) FRED C. ROBINSON.  
Lisland on a mare for a strained tendon, and am hoping for some results."

FRED C. R.

### Water Power Resources Listed

A new French estimate of the world's water power resources credits the United States with 20,000,000 available horsepower; Canada with 25,000,000; Norway with 7,500,000; Sweden with 6,750,000 and Italy and Spain with about 5,000,000 each.

### Manners.

An Alberta paper in a recent issue, under the caption of Lack of Courtesy, says: "Talking with a good citizen of the town last week, he commented upon the lack of good manners shown by the young people in not recognizing on the street, friends and acquaintances of their family whom the boys and girls know well, even though they may not be close friends. This breach of good manners appears to be due to indifference, laziness and snobbishness in a few cases. The graces of sympathy, of politeness, of courtesy and of kindness may be rather roughly used in these strenuous days, but they form the most beautiful adornment a young man or a young woman can wear."

While this paper has no desire to preach to the young people, there does seem to be a rather deplorable tendency in the direction outlined by our contemporary. Some boys and girls are naturally courteous, others have to acquire this form of refinement, but at any rate any effort put forth to treat everyone nicely soon becomes habits. We say, let the flappers flap and the fellows who are just emerging from the pin feather stage pretend they have reached manhood's estate just so long as they do not forget those little courtesies which really, after all, so long way toward what constitutes the difference between civilization and savagery.—Camrose Canadian.

### No Limit.

A paragraph remarks that a lawyer is the only man who can attend to other people's business and get away with it. "Yes business and all."

## To Holders of Five Year 5½ per cent Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922.

### CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent interest, payable half yearly, of either of the following classes:—

- Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.
- Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in full registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

**W. S. FIELDING,**  
Minister of Finance.

Dated at Ottawa, 8th August, 1922.

## AVOID ALUM IN FOOD

Baking Powder is one of the most important food ingredients. Alum or other injurious acids are frequently used by some concerns to lower the cost of production.

## MAGIC BAKING POWDER

Contains No Alum

It is a pure phosphate baking powder and is guaranteed to be the best, purest and most healthful baking powder possible to produce.

W. Matthew Williams, in "Chemistry of Cooking," says: "Phosphates are the bone-making material of food and have something to do with building up of brain and nervous matter."

Made in Canada

## Women's Corner

A FEW RAMBLING REMARKS  
BY A PRAIRIE WOMAN

Have you ever heard the beggar's curse? It is "May you always have everything you want." Do you smile? Yet just imagine each one of us with no desire left unfulfilled, no incentive to fresh effort, nothing left which we longed to be or to do, or which we longed for some other person to be or to do, but every expectation of our lives completed and our work taken away. Would life be worth living? I wonder. Would a wise mother really wish for her young son or daughter that he or she should be given everything immediately what they wanted. Just let us glance back into the years which have passed in our own lives. How many times can we recall that if we had had that which we so ardently believed we really wanted at certain crises, it would have meant disaster? There is over us an Almighty Providence which, no matter how we may dislike to believe it, often saves us from ourselves by wisely withholding from us that which we want. How like little children we are sometimes. A child will cry for the matches, or for some dangerous sharp instrument with which to play and he believes im-

PLICITLY that the possession of it would make him happy. Just so we, in our blindness cry out for that which seems to our inexperience so pleasant and so likely to make us happy, but if we were permitted to get it, we should discover, perhaps too late, that its heat would scorch us, or its sharp edge wound us.

At last we have had the first snowfall, and tired as we know we shall get of it before spring comes, yet it always seems to me so refreshing to see the pure soft snow when it first falls, covering the houses with its fleecy mantle. I suppose the women on the prairie farms are looking forward now to a lessening up of the heavy summer work, and I am sure no one begrudges her, her well earned season of breathing space. I suppose it would hardly be correct to say "rest" because even during the winter the housewife on the farm, especially where there are children, must have plenty to do.

It is hard to believe that in about six weeks' time we shall have Christmas with us again. Next week I am going to publish a recipe for a Christmas pudding which I think will be found very good. Of course, I have no doubt that many of you have favorite recipes of your own, but there may be some to whom the recipe I have in mind would be useful.

What a tendency there is today among young people to think that the sin does not matter so much as the being found out, or being publicly disgraced. I was talking to a young woman recently who could not seem to realize that public disgrace was merely the result of wrong-doing and not nearly so important in its effect on character as the wrongdoing itself. She was nineteen years of age, and had been brought up under so-called Christian influence, but it was impossible to convince her. Surely there is something wrong in the home training which will send a young woman into the world with such a viewpoint, and every true mother must feel it to be her duty to inculcate into her sons and daughters high ideals as to what is right and wrong and to make them feel that it is the sin, not what other people think of the sin, which is really harmful to them.

I shall be glad to have letters from you on any subject of interest to you and will reply to same promptly. One dollar will be awarded to the Household Hint or recipe which we consider most

useful to the majority of our readers. Address your letters to "Prairie Woman," 903 McCallum Hill Building, Regina, Sask.

### The Woman by His Side

By Vivian Yeates Laramore  
We are lavish in our praises  
Of the fellow who succeeds;  
He is lifted on each shoulder  
While the crowd proclaims his deeds;  
Bands of music go before him,  
Mounted guards on fiery steeds  
And we spread for him a banquet,  
On the fatted calf he feeds,  
While a hundred toasts are chanted  
To the fellow who succeeds.

But there's very little mention  
Of the woman by his side—  
Of the woman who has helped him,  
Who has struggled and denied;  
Of the woman who has cheered him  
When his hope had all but died.  
'Twas her love that urged him forward  
'Cross Discouragement's swift tide—  
'Tis of her I would be speaking,  
Of the woman by his side.

### REMOVING STAINS

#### Bluing

Sometimes a dress has been left too long in the bluing, with the result that there is a dark blue bluish on the dress. It is easy enough to get rid of the spot if you only know the secret. Soak the stain in a little kerosene, and wash it out with napha soap.

#### Stains on Carpet or Wall

Sometimes the boys will track into the house the crude oil or dirt from the street, which leaves a disfiguring place on the carpet. If a stain from oil or soot has injured the carpet rub the place with a dry starch, flour or salt. With a whisk brush remove as much dirt as possible and use any of these dry remedies that are suggested.

#### Fruit Stains

For a fruit stain on a pretty dress, if taken quickly, first rub on a little salt or borax, then pour boiling water through the stained part. If the stain has been on for some time use a weak solution of oxalic acid, taking care to wash it out again immediately after. Javelle water which the druggist has for sale is a good remedy for fruit stains. But it must be used only on white things, as it takes out color as well as stains. Tomato juice and salt may be applied and the dress hung out in the sun. For fresh peach stains, which are especially difficult to remove, lemon and salt seems to be the most effective remedy.

Tom Cranfill, of Texas, prominent in oil circles of late, tells the following on a minister who had discovered oil on some land he owned. The minister invited some of his deacons to go with him to the new field, so that they might share in the opportunities.

They were breakfasting at the local eating house and had decided that they would order chicken. When the waitress, a calmed and peroxidized miss, came up, the minister inquired "How is the chicken this morning?" "All right, kiddo!" she retorted. "How are you?"

## WANTED

Send for list of inventions wanted by Manufacturers. Fortunes have been made from simple ideas. "Patent Protection" booklet on request. "Proof of Conception" on request. HAROLD C. SHIPMAN & CO. PATENT ATTORNEYS

## INVENTIONS

## "Martha"

or  
THE HOME OF  
HER ADOPTION  
BY E. L.

(All Rights Reserved)

Glory's sweet, sensitive face and wonderful hair might have been a picture produced by an artist and Martha, as she stood beside her with an occasional hovering expression in her eyes, would have easily served for the Madonna.

Glory whispered, "Oh dear, I do wish they'd sit down, I get so tired of this standing and fuss, as grace was being sung and several admonitions handed out to various members of the party who were inclined to be obstreperous."

"Never mind dear," whispered Martha gently, "it will soon be over."

"Some of them make me ill, Martha," shuddered Glory, "as she looked down the long table and saw great mouthfuls of food on its way to various mouths in the gathering."

"Don't look at them darling," advised Martha, "I don't."

After breakfast Martha was detailed by the matron to keep her eye on the younger ones as they played on the deck, and to do so much needed mending at the same time. All at once she heard an altercation in which Glory's sweet treble was plainly distinguishable.

"I dare, Jane Miller, I dare, and you know I dare."

"I tell you, you dassen't, nobody dassen't even if your mother was a dancer, you dassen't."

"Oh dassen't I," almost screamed Glory in her excitement, and without another word she had stepped lightly up on the side of the boat and stood there with a mocking bow, balancing herself on one foot.

"No smarting what I dassen't?" she inquired, defiantly. Martha's heart went pit-a-pat; a sixteenth of an inch on the wrong side and the child would be overboard. She stood up and went forward slowly, afraid of startling the culprit and at the same time Mrs. Jamieson appeared on the scene, having been told the terrible story by some delighted tale bearer.

At sight of Martha's pale, anxious face Glory jumped lightly down and ran towards her. The matron, who had been startled out of her senses, took hold of her arm and shook her sharply and also reprimanded Martha in no uncertain tones.

"She did it so quickly, Mrs. Jamieson, but I am very sorry," said Martha. "Somewhat mollified that lady proceeded to administer justice also to the one who had done the daring and there ensued a loud hullabaloo of lusty weeping."

"I want you to publish these poems in book form," said a seedy-looking man to the London publisher.

Publisher—"I'll look 'em over; but I cannot promise to bring them out unless you have a well-known name." "Post—" "That's all right. My name is known wherever the English language is spoken."

"Ah, indeed! What is your name?"

"John Smith."

## SOME SASKATCHEWAN LAWS FOR WOMEN

### Aid to Expectant Mothers

To those who do not know, it may be of interest to learn that any expectant mother in the province who, for financial reasons may be unable to procure the necessary hospital, nursing aid or clothing for herself or her expected child, may obtain assistance to the extent of \$25.00 by making application to the Commissioner of Public Health. Such application should be made through the vital statistics registrar of the district in which she lives, and should receive his endorsement or approval, or that of the secretary-treasurer or reeve of the municipality, or of someone else in an official position.

This assistance is not given in cities or towns, but is intended especially for mothers in outlying districts where the doctor is put to a heavy expense in attending the patient. The money may be applied in bringing such a mother to a hospital and it may be arranged to pay it direct to the hospital, or to the nurse, or in fact it may be applied in any way which in the opinion of the Commissioner of Public Health will prove of most benefit to the expectant mother. The province of Saskatchewan is the only province where this work is in Canada, and indeed it is not carried on anywhere else in North America.

### The Joy of Being

By John Kendrick Bangs

Whether my road is leading me Perhaps I do not know;  
But, oh, the path is fair to see,  
And sweet the winds that blow.  
In sun or storm, by day or night,  
If skies are lowering or bright,  
The highroad holds so much delight  
I run with heart aglow.

The lanes may thorny be, and lead  
To steps heart-breaking high;  
The forests wild with bush and weed

My strength may mortify;  
Yet, with resolve to do and dare,  
I hold within my soul care  
For hazards spread o'er pathways  
where  
The goals worth winning lie.

It is enough to live and plan,  
To joy in earth and sea;  
To do what things a mortal can  
With spirit blithe and free;  
To prove one's strength of soul,  
and will  
To meet and overcome the ill,  
And in the end to gain the thrill  
Of manful mastery!

—Munsey's

Martha took Glory by the hand and the younger girl, apparently nothing loth to be quiet after her escapade, squatted beside the deck chair in which Martha sat, and her blue eyes, fringed with their dark lashes looked wistfully out over the sea.

(To be Continued.)

## CUTICURA HEALED BABY'S RINGWORM

On Head, Cross and Fretful.  
Hair Fell Out.

"When my baby was three months old her head broke out in little red pimples and then in a week it broke out in ringworms. The ringworms were very large and there were several on her head, and her scalp would bleed. She was very cross and fretful at times, and her hair was falling out."

"I used Cuticura Soap and Ointment, and after I had used one can of Cuticura Soap and two boxes of Cuticura Ointment she was healed." (Signed) Mrs. Lelah Sargent, Memphis, Idaho, Feb. 24, 1915.

Use Cuticura Soap, Ointment and Talcum for all toilet purposes. Soap 25c, Ointment 25c and 50c. Sold Everywhere. Cuticura Ointment, 10c. Cuticura Soap, 10c. Cuticura Talcum, 10c. Cuticura Soap, 10c. Cuticura Ointment, 10c. Cuticura Talcum, 10c.

## CLEANLINESS IS HEALTH

By the use of Gillett's Lye, house cleaning is made a pleasure instead of a drudgery. It softens the water and cleans thoroughly whether the dirt is visible or invisible. Destroys all bacteria and infectious germs, removes obstructions from drain pipes, closets, sinks, etc. Refrigerators are made delightfully fresh and clean by using one teaspoonful of Gillett's Lye dissolved in two gallons of water.

"GILLETT'S LYE EATS DIRT"

Made in Canada.

## Strong British Forces Prepared To Deal With The Trouble In Turkey

Constantinople.—The British are mobilizing every available warship, man, horse, automobile, cannon and rifle within reach of the trouble zone. They are preparing to deal a tremendous blow by land, sea and air if provoked by the Kemalist army, which, according to latest reports, is concentrating feverishly around Imdid and Chanak.

All the British barracks in Constantinople have been evacuated, and troops are marching in the streets of the capital, which is having a sobering effect on the exuberant Turks. The British soldiers are headed for strategic points on the Straits.

General headquarters has issued an official order directing the wives and families of British officers and soldiers to prepare to embark at once.

Transports with British cavalry, heavy artillery and supplies are arriving at Saldarapasa, on the Imdid Railway.

The men of the Constantinople garrison are constructing entrenchments at Scutari on the Asiatic side of the Bosphorus, which will be second line of defence, the first being at Yarijia, a small railway station between Saldarapasa and Imdid.

The British police forces in the capital have been greatly augmented, and will probably be assisted by French gendarmes. It is estimated that the present total British strength in Constantinople and the Dardanelles is about 16,000 men, which, when reinforcements, now on the way, arrive, will be increased to nearly 75,000 effective. These forces will be further strengthened by large detachments from the Atlantic and Mediterranean fronts.

The British are enrolling Russian refugees with military training for auxiliary work, while Russian tank-makers from Manchuria are being recruited as horse trainers. It is expected that eventually Great Britain will have more than 100,000 men in the disturbed area.

### Had Adventurous Voyage

Captain and Wife Ninety-One Days On Pacific

Victoria, B.C.—After being tossed about by the giant waves on the Pacific for ninety-one days, Captain George W. A. Ward and his wife arrived here from the Orient with the Chinese junk Amoy. Practically one continuous storm buffeted the little ship and twice in typhoons she lost her rudder. Then while Captain Ward was guiding his craft through a dense fog outside Victoria, a great black form loomed dead ahead. Captain Ward shoved the tiller hard over and the steel hull of a Japanese steamer passed within four feet of the Amoy's stern.

### Large Increase in Wheat Acreage

London.—According to the estimates of the New South Wales Government, says a Reuter despatch from Sydney, the area in the state under wheat cultivation amounts this year to 2,869,000 acres, representing an increase of 170,150 acres over last year's total acreage.

### Determined to Enter Thrace

Constantinople.—Hamid Bey, the Turkish representative here, informed the Associated Press correspondent that it was certain the Turkish army would declare war on the British if the British attempted to interfere with the movement of Turkish troops across the Straits to Thrace.

### Forestry Student Killed

Fort William, Ont.—J. E. Brennan, a forestry student, whose home is Deseronto, Ont., and who was working in the woods at Flanders, near Fort William, was instantly killed by a falling tree while cutting down timber.

### Will Continue Relief Work

Geneva.—The International Committee for Russian Relief, it was announced, has decided to continue work under the direction of Dr. Fridtjof Nansen, of Norway. The organization will bear Dr. Nansen's name, its title in French being "Action Nansen."

W. N. U. 1439

## WESTERN EDITORS

Chas. L. Dunford, Editor and Proprietor of The News, Oren, Alberta.

### Banish Noisy Women

Interrupters at Sitting of Irish Parliament, Maud Gonne MacBride and Mrs. Charlotte Despard were expelled from the strangers' gallery.

Dublin.—At a sitting of the Irish Parliament, Maud Gonne MacBride and Mrs. Charlotte Despard were expelled from the strangers' gallery. The expulsion was ordered because of their persistent interruption of the proceedings.

widow of the editor of the Irish Citizen, who was executed in Dublin in 1916, interrupted from the gallery on the question of prisoners, and, together with another woman who had joined in her protest, was ejected.

During the debate on the constitution, Thomas J. Johnson, Laborite, moved an amendment to omit the preamble and substitute a declaration of Ireland's sovereignty, accompanied by a statement of the right of the Irish people in the future to annul the treaty on due notice being given. Ernest Hyille, Minister of Local Government, in opposing the amendment, argued that such playing with words and formulas would "only whet the appetites of the anti-treaties, who revel in such theoretical displays."

### May Winter Again In Arctic

Crawford Party May Not Be Able to Return This Season

Vancouver.—According to a message from Nome, Alaska, there is every indication that Allan A. Crawford, of Toronto, leader of the party of Canadians sent to Wrangell Island last year by Vilhjalmur Stefansson, will have to remain there another winter. On August 18 the power schooner, Teddy Bear (Captain Joseph Bernard) left Nome for Wrangell Island to bring out the Crawford party, which had gone there to hold the island for Canada.

### Destructive Typhoon

Honolulu.—Miyake Jima, one of the seven isles of Tsp. in Northeastern Japan, has been swept by a typhoon, one of the most disastrous in the island's history, which destroyed 5,100 homes and damaged 45 vessels, according to advices from Tokyo to the Nippo Jiji, a Japanese newspaper in Honolulu. Nine lives were reported lost.

PASSING THE "BUCK."

—(Daily Express (London))

## British Subjects Do Not Change Nationality Within The Empire

### Bolivia and Chile May Have War

Geneva.—The relations between Bolivia and Chile are such that "grave difficulties" threaten unless the mediation of a friendly power of the arbitration of the League of Nations can be secured. This declaration is made in a letter received by the Secretary of the League Assembly from Alfredo Gutierrez, Bolivian delegate to the assembly. He points out that Bolivia has been unable to reach an understanding with Chile by direct negotiations regarding revision of the treaty of 1904.

### WILL WAIT FOR DROP IN COAL

FORD PLANT SHUT DOWN UNTIL PRICES EASE OFF

Detroit.—Henry Ford and his executives are working "almost day and night" in an effort to find a way out of the Ford Motor Company's coal problems and the manufacturers is determined to re-open his Detroit plants "at the earliest hour possible," it is learned.

Mr. Ford was represented as being unshaken in his resolve to keep his plants closed until coal prices have swung back to what he considers a fair figure.

While Mr. Ford and his department managers were seeking a way out of the difficulty, the job of re-opening the Ford plants was being given serious study by the Detroit Board of Commerce, which is making an effort to obtain coal for the motor concern. Closing of the Ford industries has thrown approximately 25 per cent. of the working men in the Detroit district out of work.

### Says States Should Help Great Britain

Hamilton Man at Cleveland Touches On Turkish Situation

Cleveland.—The United States should be prepared to co-operate with Great Britain in handling the Turkish situation that the peace of the world may be maintained, declared Sir John Gibson, of Hamilton, Ontario, at the 11th convocation of the Supreme Council, 23rd Degree, Ancient Accepted Scottish Rite Masonry for the Northern Masonic jurisdiction of the United States.

Sir John touched upon the Turkish problem in conveying the fraternal greetings of Canadian Scottish Rite Masonry to the Council.

### Come North For Game

Regina.—Over 500 Americans came into Saskatchewan this year to shoot ducks, according to an estimate by Provincial Government officials.

Vancouver.—"I should like to suggest that you abandon these words 'immigration' and 'emigration' in respect of the movement of Britons to the dominions," urged Major A. E. Belcher, of London, head of the Empire Exhibition mission touring the dominions, in a speech to the Canadian Club here. "These changes of residence are not changes of nationality. They are simply movements from one part of their country to another. I suggest that the word migration be used in future. They are still British subjects anywhere in the Empire." Imperial unity was declared to be the keynote of the proposed exhibition of products of Great Britain, the dominions and the colonies, to be held in London in 1924.

Discussing land settlement, the speaker stated the dominions could not expect to obtain efficient farm labor from the Mother Country. There is employment at home for more efficient farm laborers than we have," he said. "But a man's previous occupation is not necessarily a vital factor in determining what success he may have in a new country."

"The best dairy farmer I saw in West Australia was eight months previously a trim conductor in Lambeth," he said.

Major Belcher said the Prince of Wales was taking more than a perfunctory interest in his position as chairman of the exhibition general committee, and was attending all meetings and taking a lively interest in the proceedings. He indicated cable communications which he had had from His Royal Highness during his present tour.

### Veterans Ready to Enlist

Vancouver.—Veterans who served in the Near East during the Great War are volunteering here steadily for a possible contingent to Constantinople. Some of these have pointed out to Brig-Gen. Victor Odium that the full in the Turkish advance is characteristic of the Turks' method of warfare. Local veterans of the Mesopotamian campaign expect further trouble, and an extension of the fighting to Mesopotamia, General Odium says.

### Canadians Reach Malta Safely

Boston.—The American Board of Commissioners for Foreign Missions received a cablegram from Dr. Alexander MacLachlan, of Kingston, Ont., President of the International College at Styrms, saying that he and his family were safe at Malta. The message said that James L. Murray, of Ontario, a member of the college faculty, was also at Malta.

### Raid on Liquor Houses

Windsor, Ont.—More than half a million bottles of beer, ale and porter, are being held by provincial authorities following a series of raids on brewery company warehouses in and near this city. The raids were made under order of Hon. W. E. Roney, Attorney-General of Ontario, who charges the companies with failing to make proper returns of the liquor sent out of the country.

### Prominent Miner Drowned

Nome.—James Andrews, prominent miner, operating gold mines between Cripple and Rodney Creeks, west of Nome, was drowned while attempting to ford Penny River, nine miles from here.

### \$40,000 Winnipeg Fire

Winnipeg.—Fire caused a loss estimated at \$40,000 to the plant and building of the W. J. Boyd Confectionery company, Spence Street. The loss is covered by insurance.

### Died in 104th Year

Montreal.—Mrs. James Johnston died here in her 104th year. She was born at Hamilton, Scotland, in 1815.

### Schooner Wrecked

Nome, Alaska.—The coastwise schooner Olga is a total wreck on the beach at Fort Safety, two miles east of Nome.

### A Traveler's Literary Effort.

The following is supposed to be a letter from a drummer to his home office. If this is a sample of their literary ability we must say they cannot write as smoothly as they talk—

i called like you sed in this god forsaken town and seen this Jones motor emporium who has the dodgem agency hear.

it makes me tired these literary efforts in a burg like this and if you cant read the 1st part of this thats where the slew slipped over the pitcher on the washstand i can tell you what with the heat and the nail in this proon box on which i am sitting i am getting pretty well fed up riting this.

it is rite wot you sed this burd has a bunch of junk he got from the Case hardened hardware Co of course they would of not bot if i had a been round with their cheap prices and all.

i told this burd rite off i did not expect to sell him anything so he would not be disappointed i kood tell this from the look of the town which is full of stumps and chock holes and things but i told him also you would make me call on him so if he did not want anything i would be toddeling on as i did not want to stay hear 2 nites with the musketees and everything. first off i tried to land this guy on one of those big jacks we have had so long his garage has only mud for a floor and he says he needs one of those jacks as bad as a grass-hopper needs a aroplain which i gess is rite.

well this guy is pretty funny when you get to no

### A Forest of Sunflowers.

The growing of sunflowers has passed the experimental stage and many farmers have this year devoted a small acreage to this succulent cattle food. The other day a giant specimen of the sunflower family was brought to the office of the Camrose Canadian office by E Stromberg, New Norway. It measures 9 feet and weighs 12 lbs, the stalk measuring 6 inches in circumference. Mr Stromberg has a young forest of sunflowers in a ten acre field, and has built a trench silo for their accommodation. The trench silo has solved the difficulty of storing ensilage and is said to be a very satisfactory substitute for the regular silo.

him like I done and when i showed him that small sample of shock absorber he says well what is it fore can you imagine I tells him it is for putting in a fether led to check the rebound hah! hah! that maid him laff alrite he says he isnt needing any as he sleeps on the counter well he certainly has a bnm place just like the town and i dont think we could take a chance on him but I went thru the catalog with him and he bot of me a flock of these old tire carriers at 50c i also unloaded him a bunch of rivets coil points valve insides stovepipe

wire a three cornered elbow gawgaws and felt gaskets he also bought a couple of sets of Brico rings as he said he got these hammered before and hammered them with a mallet some of these burds dosnt no anything i told him they were hammered in before he got them anyway he says they give his cars more compression that form the house got for reports is all rong there is not enuff rume where have you got hobbles i asked the guy his hobby so he says he has 2 in th summer mostly fishing i'll tell you the other when i come in.

yours aff.

P.s.—would suggest we give him a line of credit say about \$25 he was in the same devision as me overseas and this is all he could be worth.

WORLD HAPPENINGS  
BRIEFLY TOLD

Thieves stole over \$540 worth of platinum while it was being heated in crucibles over a furnace in a temporarily vacant Paris laboratory.

King Albert of the Belgians has accepted an invitation to take part in New York in 1924 in the third centenary celebration of the founding of that city.

A floating mine of German construction has been discovered by the fishermen of Antwerp right across the route of the steamers plying between Antwerp and Nice.

Lord Reading, the Viceroy of India, sent to the Dalai Lama over the new telegraph line to Tibet, recently opened, the King's thanks for his friendly greetings.

The Combined Court of British Guiana has, by resolution, authorized the Colonial Government to take over and maintain the wireless station established in the colony by the Admiralty some years ago.

George Selen, an Egyptian student, fired a shot at an automobile in front of the Palace of the Elysee, Paris, believing the car to be President Millerand's. The shot went wild. President Millerand was at his country residence at Rambouillet at the time.

The Ford Automobile Company has bought a large tract of land on the outskirts of Antwerp, where an assembling plant will be erected, the plant will be ready for operation early next year. Automobile parts will be sent from Detroit to Brussels and the cars assembled there.

Sir Lee Stack, the Governor-General of the Sudan, has been negotiating in London for further financial support for Sudan irrigation schemes. It is understood that matters have been arranged that it will be possible to resume during the autumn, work on the Blue Nile dam, Wolkar, which was suspended last winter.

A proposal is made to establish an aerial line of communication between Tulehu, on the South-West Madagascar coast, and Antsirabe, in the interior, which is shortly to be inaugurated. The line will require to two days a journey which at present takes one month.

## Short Crop in France

Whole Wheat Bread to Replace the White Loaf

Whole wheat bread will replace throughout France the pure white loaves and rolls that since the war have received such a warm welcome back to the French dinner table. This is due directly to the fact that this year's wheat harvest in France is estimated much below the yield of last year when there was a bumper crop of 88,000,000 quintals.

It is feared that before the 1923 wheat crop can be reaped the country will have to buy some 20,000,000 quintals of foreign grain wheat to meet the requirements of the population.

## Unit to Live—Must Die

This verdict is rendered a thousand times every week—no corn can live, it must pass out, drop off, if Putnam's Extractor is applied to corn and warms. Use the old reliable "Putnam's," it never fails, 25c at all dealers.

Birmingham, Ala., claims the largest Sunday school attendance in proportion to population of any city in the world.

## Dye Skirt, Coat, Draperies With Diamond Dyes

Each package of "Diamond Dyes" contains directions so simple that any woman can dye or tint faded, shabby, worn, dresses, waists, coats, sweaters, stockings, hangings, draperies, everything like new. Buy "Diamond Dyes," of no other kind—then perfect home dyeing is guaranteed, even if you have never dyed before. Tell your drug gist whether the material you wish to dye is wool or silk or whether it is linen, cotton, or mixed goods. Diamond dyes never streak, spot, fade, or run.

A man of seventy has renewed his finger nails 136 times and has grown 7 ft. 9 in. of nail on each finger.

## CATARRHAL DEAFNESS

Is greatly relieved by constitutional treatment. HALL'S CATARRHAL MEDICINE is caused by an inflamed mucous membrane of the Eustachian tube. When this tube is inflamed, you have a running ear, a deaf ear, a sore throat, and when it is entirely closed, inflammation can be reduced, your hearing restored, and your health improved. HALL'S CATARRHAL MEDICINE acts through the blood on the mucous surface of the inflamed Eustachian tube, restoring normal conditions.

Circulars free. All Druggists. W. J. Cheney & Co., Toledo, Ohio.

A truckload of hay was one of the wedding presents given to the bride of a Newmarket trainer in England.

Hard and soft combs both yield to Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

The electric eel, found in Brazil and Guiana, can administer quite a severe electric shock, sometimes strong enough to overcome a horse.

## Right You Are

"Running a business," says someone, "is a good deal like riding a bicycle. You have to keep on going or fall. There are darned few men who can stand still and maintain their balance in the store, or on a wheel—Better Business."

## PALE AND SICKLY GIRLS AND BOYS

Need All the Strength That Rich, Red Blood Can Give Them

Youth is the time to lay the foundation for health. Every girl and every boy should have plenty of pure, red blood and strong nerves. Thin, impure blood they start life with handicap too great to win success and happiness. Rich, red blood means health, full growth, strong nerves, clear brain and good digestion. In a word pure blood is the foundation of health.

The signs of weak, watery blood are unmistakable. The pale, irritable girl or boy, who has no appetite or ambition, is always tired out, short of breath and does not grow strong, is a victim of anemia—the greatest enemy of youth. There is just one thing to do for these girls and boys—Pink Pills. You can't afford to experiment with other remedies, for there must be no guesswork in the treatment of anemia. Dr. Williams' Pink Pills act directly on the blood, giving it the elements it lacks, thus developing strong, healthy girls and boys. Mrs. R. K. Hinch, Hephworth, Ont., tells as follows what these pills did for her daughter: "I think it a duty to let others know the benefit which Dr. Williams' Pink Pills have done for my daughter, and I hope this may serve to give her Dr. Williams' Pink Pills. She was weak, nervous and badly run down. She took medicine from the doctor but got no benefit, and finally she was not able to walk to school. I was advised to give her Dr. Williams' Pink Pills, which I did, and after taking them for a time she was restored to perfect health. I cannot speak too highly of these pills."

You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

After London, in point of population of British cities, come Glasgow with 1,000,000 inhabitants, and Birmingham, with 800,000.

## A Simple Little Gown for the Pretty Little Miss

Here is an evening gown of gray chiffon, whose narrow lines in its delicacy of color and its simplicity of line. The flowers at the belt are its only trimming.

## Red Cross Nursing Outposts

Extending Nursing Facilities to Outstanding Sections in Saskatchewan

The Red Cross will establish one of its Nursing Outposts at Kelvington, thus bringing the total of hospitals and outposts operated by the Red Cross in Saskatchewan to eight, located at Paddockwood, Carleton Place, Rm. Robert, Bengough, Cut Knife, Meadow Lake and Kelvington.

The Red Cross has also decided, working in co-operation with the Rural Municipality of Souris Valley No. 7, and Lomond No. 37, to place district nurses at Colgate and Brouhard, the cost of such service to be divided equally between the Red Cross and the municipalities.

This decision was reached at a recent meeting of the committee on Medical and Nursing Services. Reports presented to the committee showed that during the six months of the year, nursing days in the six outposts in operation for a whole or part of that period totalled 1,425, and that 25 babies were born.

The Council of R.M. of Bepogah No. 40 are so well satisfied with the work being done in the Red Cross Outpost there that at a recent meeting it was decided to make important alterations and extensions to the present building, or build a new, larger and more modern one.

The two years for which the Red Cross agreed to operate the outpost at Paddockwood expire in October, and the people there have petitioned for a renewal agreement, and in so doing refer in terms of high praise to the splendid services rendered to them in their isolated location, far removed from all other medical or nursing help.

The Red Cross has also authorized the establishment of an outpost at Medstead on condition that a suitable building is provided, but steps in that direction have been deferred until next spring.

Eleven graduate nurses are now employed permanently by the Red Cross in Saskatchewan. The expenditure for the past twelve months in equipping and operating outposts and maintaining district nurses in the field has been approximately \$20,000, while donations for this work have amounted to about \$4,000.

Words mark the strength and underwrite the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

## Editorial Apology

The editor of a small paper in a remote district of Southern California found himself unable to insert his usual column of births, marriages and deaths. Thinking that some apology was needed for such an unwarranted circumstance, he inserted the following, in clear, black type: "We regret that owing to pressure upon the space several deaths have been inevitably postponed."

## OIL LIGHT BEATS ELECTRIC OR GAS

## BURNS 94% AIR

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U.S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe. Burns 94 per cent. air and 6 per cent. common kerosene (coal-oil).

The inventor, T. Johnson, 679 McDermott Ave., Winnipeg, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money make \$20 to \$50 per month.

## Launches Glider 4,000 Feet Up

Herr Klempner, celebrated German gliding champion, had a narrow escape from death at Zurich. He launched his diminutive motorless glider from a balloon at 4,000 feet and dropped like a plummet toward earth, falling in fifteen seconds, but averting a fatal crash.

It is usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the stomach and intestines, causing serious disorders of the digestion and preventing the infant from deriving sustenance from food. Miller's Worm Powders, by restoring the digestion and serving to store the organs to healthy action.

The world's nut trees are said to be capable of supplying nourishment to its entire population.

## It's a fine thing to keep out of trouble—

but it's a finer thing to know how to get out of trouble after you have gotten into it.

Many people thoughtlessly get into trouble by loading up with heavy, indigestible foods which fail to supply the essential elements for repairing the daily wear on their nerves and body tissues.

It is well to know that Grape-Nuts with good rich milk is a highly nourishing food, providing all the necessary nutritive and mineral elements in proper form for

ready assimilation by the system.

When you make Grape-Nuts a substantial part of your regular daily diet, Nature will quickly assert herself and build healthy nerve cells and sound body tissues.

Crisp and crunchy Grape-Nuts, made from wheat and malted barley, is a satisfying food for breakfast—a welcome answer to the call of appetite.

The familiar Yellow package contains more nourishment in less bulk than any other cereal food.

### Resurrection of the Dead;

When Will It Commence?  
DUCHOLKE'S HALL.

Sunday, Oct. 1st.

SPEAKER.

Mr. H. Looker.

### Good News for Stockmen.

"Great Britain will import most of Canada's surplus stocker cattle, to the extent of approximately 120,000 head annually, when the embargo against Canadian cattle is finally removed," said Philip D Chapman, of Falkenham, Norfolk, Eng., President of the Live Stock Traders' Association of Great Britain, upon his arrival in Calgary, on Sunday last.

Mr Chapman and his partner are in Western Canada for the purpose of investigating cattle conditions here, and to make arrangements with Canadian cattle men for trade between this country and Gt. Britain.

They are the first English cattle traders to arrive in Alberta on this mission. More are expected to follow when the embargo lifts.

### Stony Plain and District

Miss Ries, from Vernon, B. C., was visiting this week with Miss Armbruster, on First street.

Mr Art Luge took his wife to the Royal Alexandra Hospital on Monday, where she underwent an operation for cancer of the breast. Tuesday at 10.35; a very serious operation; but at 5 o'clock she was resting quite easily, with but little pain.

Rally Sunday in connection with the Sunday School will be observed next Sunday at the local Methodist Church, when it is expected the scholars will take an active part in the exercises.

The sod fire which has been running on the Chas Ries farm on the Baseline, near the Meridian road, last week spread from the field to the road allowance, burning down some of the posts. The Fire Warden issued instructions to the owner's local representative to have the fire extinguished.

An effort will be made to hold a meeting of the Rifle Club next Saturday night.

Wood & Zucht last week shipped 236 hogs to the packing plant.

## Exide Service Station.

Not so long ago all automobiles were cranked by hand.

The year of 1911 saw the first car regularly furnished with electric starting and lighting equipment.

It had an Exide Battery.

Today millions of cars are Exide-equipped. Why not you become one of these happy users, with your next new Battery?

Prices, \$29.50, and up.

All Exides Are Guaranteed.

## Stony Plain Garage,

### Victory Bonds.

Returns received to date by the Dept. of Finance indicate a very general acceptance of the proposals for the conversion of 1922 Victory Bonds into new bonds bearing 5 per cent interest and running for a further period of five or ten years as desired. Many holders would like to take up considerably more of the new bonds than they have of the maturing issue, but this is not permitted, as cash subscriptions are not being invited at this time. It is open, of course, for such persons to add to their holdings of 1922 bonds by purchasing them in the market or from holders who require the cash and then to surrender them for new bonds. It is known that this is being done.

### Here's a Busy Mother.

A sow that has given birth to 90 pigs in five litters is owned by J R Sloan of West Lorne, Ont. She gave birth to 21 pigs a few days ago, 20 of which are living. Fourteen of the pigs are being raised by the sow, while the owner is feeding the other six with the bottle.

### Business goes

where it  
is invited;  
and stays  
where it  
is well-  
treated.
